

Adapter cable 1450a Connection for WiFi Smart Plug and Curtain Motor

Important Note:

Before connecting, the curtain track must be working with the remote control first.

Note: Only work with the Curtain Call Motor: CL-920A, CL-920C3, S168A or S168-3Y

After the connection, download the APP of the WiFi smart plug to operate the curtain motor.

After that, connect the WiFi smart plug to Amazon Echo to operate the curtain by Alexa.

Video instructions for various WiFi Smart Plug:

TP-Link: <https://www.youtube.com/watch?v=At7V-lK-30o>

idevices: <https://www.youtube.com/watch?v=0pz3f7cfk08&t=243s>

Note: For Apple iPhone Siri (HomeKit) control, only Idevices will work.

Since the WiFi Smart Plug is an ON and OFF device, you will have to say “Alexa, turn on the curtain” or “Alexa, turn off the curtain” but it can be changed as follow:

To change this command to “Open the curtain” or “Close the curtain”, please go to Amazon Alexa APP, go to “Routines” and set up the commands as shown below:
